Practices: Agile/Scrum, Debugging & Performance Optimization

PROFESSIONAL SUMMARY

Full-stack software engineer with hands-on experience building RESTful APIs, scalable web applications, and AI-powered automation workflows using n8n, OpenAI, Gemini, and OpenClaw. Skilled in JavaScript/TypeScript, PHP (Laravel), Java (Spring Boot), and Vue.js/React for web development. Track record of improving system stability and cutting manual effort through clean code and well-designed API integrations. Career Service (Professional) eligible.

PROFESSIONAL EXPERIENCE

Workflow Automation Developer at Sophi Outsourcing

Dec 2025 - Present

- Designed and implemented AI agents in n8n, utilizing prompt engineering and robust workflow logic to automate complex data processing, content generation, and customer support tasks.
- Build custom API integrations connecting CRMs, webhooks, and cloud applications to trigger AI models in real time.
- Apply OpenAI and Gemini models for data processing, image generation, and SEO metadata generation.
- Maintain WordPress environments, including updates, security hardening, backups, and performance tuning.
- Reduced manual process time by 70% by building error-handled, monitored n8n automation workflows that run unattended around the clock.

Full-Stack Developer (Freelance) at Diamond Branding Co.

July - Aug 2025

- Built a full-stack affiliate marketing dashboard in React/TypeScript with real-time analytics, commission tracking, and automated link generation.
- Developed both user-facing and admin interfaces, including performance charts and withdrawal management.

Information Technology Instructor at Southern Tech College Foundation Incorporated

Mar 2025

- Taught college-level Web Development and Computer-Based Accounting courses with a hands-on, project-based approach.
- Delivered instruction on HTML, CSS, and modern web development fundamentals to build industry-relevant student skills.

Full-Stack Developer at 3 Clicks Cloud (www.3clickscloud.com)

Mar 2024 - Feb 2025

- Built full-stack web applications using Vue.js, Spring Boot, and MariaDB.
- Designed scalable systems with RESTful APIs to support peak performance loads.
- Debugged full-stack issues to improve application stability and user experience.
- Optimized applications through query refinement and API enhancements.
- Delivered features end-to-end within Agile teams, from design through launch.

Web Developer Intern at Miller Solutions Development

January - May 2023 | Dumaguete City (www.millerdevelopment.se)

- Created, shared, and tested UI/UX designs in Figma under the direction of the Senior Developer.
- Supported the front-end team in building a UI/UX solution for a client web application.
- Designed and built a personal portfolio website.
- Performed data entry and formatted data for SQL databases.
- Gained hands-on experience with the Vue 3 framework, TypeScript, and API integration.

CERTIFICATION

Career Service Eligibility - Professional - Civil Service Commission

General Rating: 84.10
